

Union County Board of Education Policy 3-12 addresses distributing political materials but not visits. Here are established guidelines concerning politicians' visits to schools:

- 1. Politicians may visit schools. Visits must be by prearranged appointment with the principal. If a principal allows one politician to visit, equal opportunity and treatment must be afforded all politicians who make a visit request.**
- 2. Politician visits cannot interfere with the instructional day of students unless it is directly related to grade appropriate curriculum (for example, teaching a high school civics or political systems class).**
- 3. No video or photos with children can be made for political promotion without the written consent of parents.**
